1. Applicant's election of Invention I, claims 12, 19, 20 and 22 in the reply filed on 4/22/2004 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a))

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 12, 19, 20 and 22 are rejected under 35 U.S.C. 102(b) as being anticipated by either Lubbers et al. or Campau et al.

Both Lubbers et al. and Campau et al. show brake assist systems that control pedal feel (reduce damping effect) during brake assist control.
